## EDUCATION

---

**McMaster University** - Bachelor of Engineering (B.Eng.), Mechatronics Engineering Sep 2021 – Dec 2026 (Expected)

- Awards: Dean's Honour List (2021–2025), Engineering Award of Excellence (95%+ Admissions Average)
- Relevant Coursework | [Data Structures & Algorithms](#), [Networks & Security](#), [Operating Systems](#), [Compilers](#), [AI](#)

## EXPERIENCE

---

### Shopify Inc

May 2026 – Present

**Software Engineering Intern** | Ruby, GraphQL, React, TypeScript, GCP, SQL, Sidekiq, BigQuery Toronto, ON

- Led implementation of **feature flag infrastructure** with low error rate (**<0.1%**) to support phased feature rollouts and rollbacks to **92.6k+** merchant stores & enable peer engineers to safely deploy hundreds of PRs
- Prevented fulfillment of **59.7k+** fraudulent transactions by shipping real-time fraud warnings for Shopify POS
- Introduced new permissions & orchestrated backfills across **74M+** records to enable users to perform stock counting
- Achieved team's first **single-digit bug count** in months by leading quality sprint to resolve **18** high-priority bugs, ship **44** PRs, and cut open reviews from **56 to 7**

### Shopify Inc

Sep 2025 – Dec 2025

**Software Engineering Intern** | Ruby, GraphQL, React, TypeScript, GCP, SQL, Sidekiq, BigQuery Toronto, ON

- Architected backend job processing for e-commerce app to bound execution times for **40.2M+** jobs, stabilizing job service times from a variable **2 hrs** to a max of **1.1 mins** & enabling meaningful alerts with low latency (**<20ms**)
- Reduced job wait times by **90%** by provisioning GCP worker pods & weighted job queues to optimize server usage
- Eliminated **\$34.7M** erroneous charges by developing row-level SQL filters to prevent duplicate items during checkout
- Led team's first API migration & moved pagination from frontend to backend to restore visibility to **\$1.75M+** GMV

### Ciena Corp

Sep 2024 – Sep 2025

**Software Engineering Intern** | Python, AWS, PostgreSQL, FastAPI, Terraform, DataDog Ottawa, ON

- Designed **REST API** integrating Rapid7, Armis & ServiceNow to automate vulnerability management with network blocking for non-compliant devices across **4000+** Ciena devices scanned weekly, for use by security team
- Reduced query times to database from **2000 ms** to **12 ms** by using aggregator functions and indexing foreign keys
- Shipped Atlassian token expiration mail service to preempt authentication failures for **150+** Ciena engineers
- Wrote **410+** unit tests to increase test coverage from 50% to **88%** using unittest and PyTest frameworks

### Jetson Infinity

May 2024 – Aug 2024

**Software Engineering Intern** | Python, C++, OpenCV, Llama3, YOLOv5, Selenium Hamilton, ON

- Implemented chatbot for use in Zoom pitches with clients leading to a **75%** close rate, helping generate **\$60K** revenue
- Developed **9** AI-based modules for robotic arm as part of **OOP** curriculum for **5k+** students across Canadian schools

### Noze Inc

May 2023 – Aug 2023

**Software Engineering Intern** | Python, C++, Streamlit, Robotic Arm Montreal, QC

- Presented [intern project](#) <sup>7</sup> to **Bill & Melinda Gates Foundation** to help secure **\$1.7M grant** for the company
- Reduced time spent on QA by **50%** by spearheading creation of embedded system to automate quality checks of PCBs
- Designed PCB selection UI to eliminate manual QA-related errors for 12+ lab technicians, saving **\$600 daily**

## TECHNICAL SKILLS

---

**Languages** | Python, C/C++, SQL, Ruby, TypeScript

**Frameworks** | React, Ruby on Rails, GraphQL, FastAPI, SQLAlchemy, PyTest, Jest

**Tools** | AWS, GCP, PostgreSQL, Datadog, Terraform, Postman, Git, Graphite, Bash
